ABOUT ME

I am a junior software engineer who is open to innovation and focused on continuous self-improvement. I have problem solving skills and demonstrate the ability to quickly learn and adapt to new technologies. My effective time management skills ensure that tasks are completed on time. I take responsibility for my work and strive to deliver high quality results. With experience in software design, development and testing, I am eager to bring my success to new teams and continue to grow in my career.

SKILLS

ReactJS	Javascript	Typescript	Selenium
Tailwind	HTML	CSS	Sass
NodeJS	Material UI	Bootstrap5	Jest JS
PostgreSQL	Postman	Java (Beginner)	Git
Trendyol Baklava UI	LaTeX	Agile Methodology	Jira

EXPERIENCES

- HUAWEI TECHNOLOGY

Assistant Software Developer

03.2023 - Present

• HR SaaS Project:

I developed the front-end of human resources back office applications using ReactJs and Material UI.

- Analyzing and coding the desired features,
- Refactoring existing components according to current requirements,
- I supported the review and analysis of customer requirements and the creation of tasks.

• RaaS Project:

I supported the front-end development of recommendation systems using ReactJs, Material UI, and CSS.

- Frontend coding was done according to the requests from the Research team.

• EBG Main Website Project:

This project aimed to enable users to create websites with ready-made components. My responsibilities included:

- Recreating, refactoring and testing existing pages,
- Coding and testing required components,
- Performing migrations and creating new pages and UI components,
- Testing completed pages and components with Selenium,
- Automating and testing the migration of existing pages with Java,
- Preparing and maintaining all documentation, templates, and plans for the project.

- TRENDYOL TECHNOLOGY

Associate Software Developer

05.2022 - 09.2022

I worked as a frontend developer in the PLM team at Trendyol Technology. Using technologies like Vue.js, I designed and coded user-friendly dashboard screens for PLM customers. These screens allowed customers to view and track their account summaries, manage product lifecycles, and gain insights through data visualization. Additionally, I participated in code reviews and contributed to improving the overall user experience.

PROJECT & COMPETITIONS

- Huawei Cloud Developer - Tech Essentials Certification (08.2024)
- Huawei Sparkling Award (12.2023)
- **1st Place** in Viessmann & Depark Create4Automate Ideation
- **2nd Place** in Izmir Institute of Technology Robothon Competition
- Autonomous Mini Car Project (RaspberryPi, Image Processing)
- Single Cell Classifier for Single Cell RNA Sequencing Datasets
