ABOUT ME

I am a junior level frontend software engineer who is open to innovations and focused on continuous self-improvement. I have experience in software design, development and testing. I want to evaluate my success in previous projects in new teams.

SKILLS

ReactJS	Javascript	Typescript	Selenium
Tailwind	HTML	CSS	Sass
NodeJS	Material UI	Bootstrap5	Jest JS
PostgreSQL	Postman	Java (Beginner)	Git
Trendyol Baklava UI	LateX	Agile	

EXPERIENCES

- HUAWEI TECHNOLOGY

Assistant Software Developer

03.2023 - Present

• HR SaaS Project:

I developed the front-end of human resources back office applications using ReactJs and Material UI.

• RaaS Project:

I supported the front-end development of recommendation systems using ReactJs, Material UI, and CSS.

• EBG Main Website Project:

This project aimed to enable users to create websites with ready-made components. My responsibilities included:

- Recreating, refactoring and testing existing pages,
- Coding and testing required components,
- Performing migrations and creating new pages and UI components,
- Testing completed pages and components with Selenium,
- Automating and testing the migration of existing pages with Java,
- Preparing and maintaining all documentation, templates, and plans for the project.

- TRENDYOL TECHNOLOGY

Associate Software Developer

05.2022 - 09.2022

I worked as a frontend developer in the PLM team at Trendyol Technology. With technologies like VueJs, I was designing and coding user-friendly dashboard screens for PLM customers. These screens were intended for PLM customers to view and track their account summaries.

PROJECT & COMPETITIONS

- Huawei Sparkling Award (12.2023)
- **1st Place** in Viessmann & Depark Create4Automate Ideation
- **2nd Place** in Izmir Institute of Technology Robothon Competition
- Autonomous Mini Car Project (RaspberryPi, Image Processing)
- Single Cell Classifier for Single Cell RNA Sequencing Datasets
